

## METRIC QUICK REFERENCE CHART

Use the table to below as quick reference of the load capacities of each screw size. Dynamic load assumes 1,000,000 revolutions of life according to ISO3408-3 standard. See the metric catalog for calculations to help refine the selections based on design requirements and end support conditions.

SCREW DIA. X LEAD	DYNAMIC LOAD (kN)	MAX. STATIC LOAD (kN)	SCREW MINOR DIA.
16x5	7.6	10.6	12.7
20x5	14	23.8	16.7
25x5	19	37.8	21.7
25x10	23.5	39	20.5
32x5	22	51.6	28.7
32x10	27.1	52	27.8
40x5	24.3	65.6	36.7
40x10	61.5	124.1	37.
